

Generate new value from your supply chain – with Oxygen

INCOME. SOCIAL VALUE. EFFICIENCY.

The leading supplier of early payment programmes

More organisations in the public and private sectors choose Oxygen for one simple reason: our programmes work. The principle of settling an invoice early in return for a small discount may well be simple. But we make it work across your internal and external ecosystem, for suppliers of every size. For many of our clients, that results in an impressive monthly income.

How do we do this?

Our effectiveness stems from three elements working in harmony:

- **Technology** – robust and functionally-rich, our technology silently calculates your discounts accurately and automatically each night. It will also integrate seamlessly with your existing ERP system, and it includes a KPI dashboard and e-invoicing at no extra cost.
- **Processes** – technology cannot work in isolation. We'll work tirelessly to optimise your P2P process so payments can be made faster without compromising control. Introducing early payment incentivises your business and your suppliers to deliver long lasting improvements.
- **Supplier Onboarding** – early payment systems will achieve little if supplier participation is low. Over many years, our professional team has developed an approach with a proven track record for bringing suppliers on-board. Average participation rates for the industry are under 10%: we consistently exceed 50%.

Using our experience and best practice in P2P, we'll project manage the entire programme for you. Proven and safe, early payment introduces stability into your supply chain in a way that's both sustainable and fair, while injecting liquidity into the local economy.

What happens next?

1. We would be delighted to undertake a 2-3 week piece of work on your premises resulting in an Assessment Report that demonstrates the specific benefits for your organisation.
2. If you are satisfied with the findings we move into an 8 week implementation, after which income starts to flow.

Please get in touch – we'd love to talk.
