

## BRIEFING PAPER

Number 6643, **Fixed Broadband: Policy and Speeds**

### **Appendix 2: Detailed maps of GB urban areas**

This document contains maps of fixed broadband speed in Great Britain at regional level. It forms a supplement to the main briefing paper and data downloads, which can be found [here](#). It is based on data from Ofcom's [Connected Nations 2015](#) release.

The maps here show the percentage of connections which are receiving speeds lower than 10 Mbits/second. Government policy is to provide speeds of 10 Mbits/sec to all connections by 2020. The map shows this data for lower level super output areas, which are small areas with a population of around 1,500.

Other measures are available. On request, library staff can provide MPs and their staff with maps of their local area for the following measures:

- Average fixed broadband speed
- Availability of superfast and ultrafast lines
- Percentage of connections receiving speeds less than 2 Mbits/sec
- Percentage of connections receiving superfast speeds (30 Mbits/sec or higher)

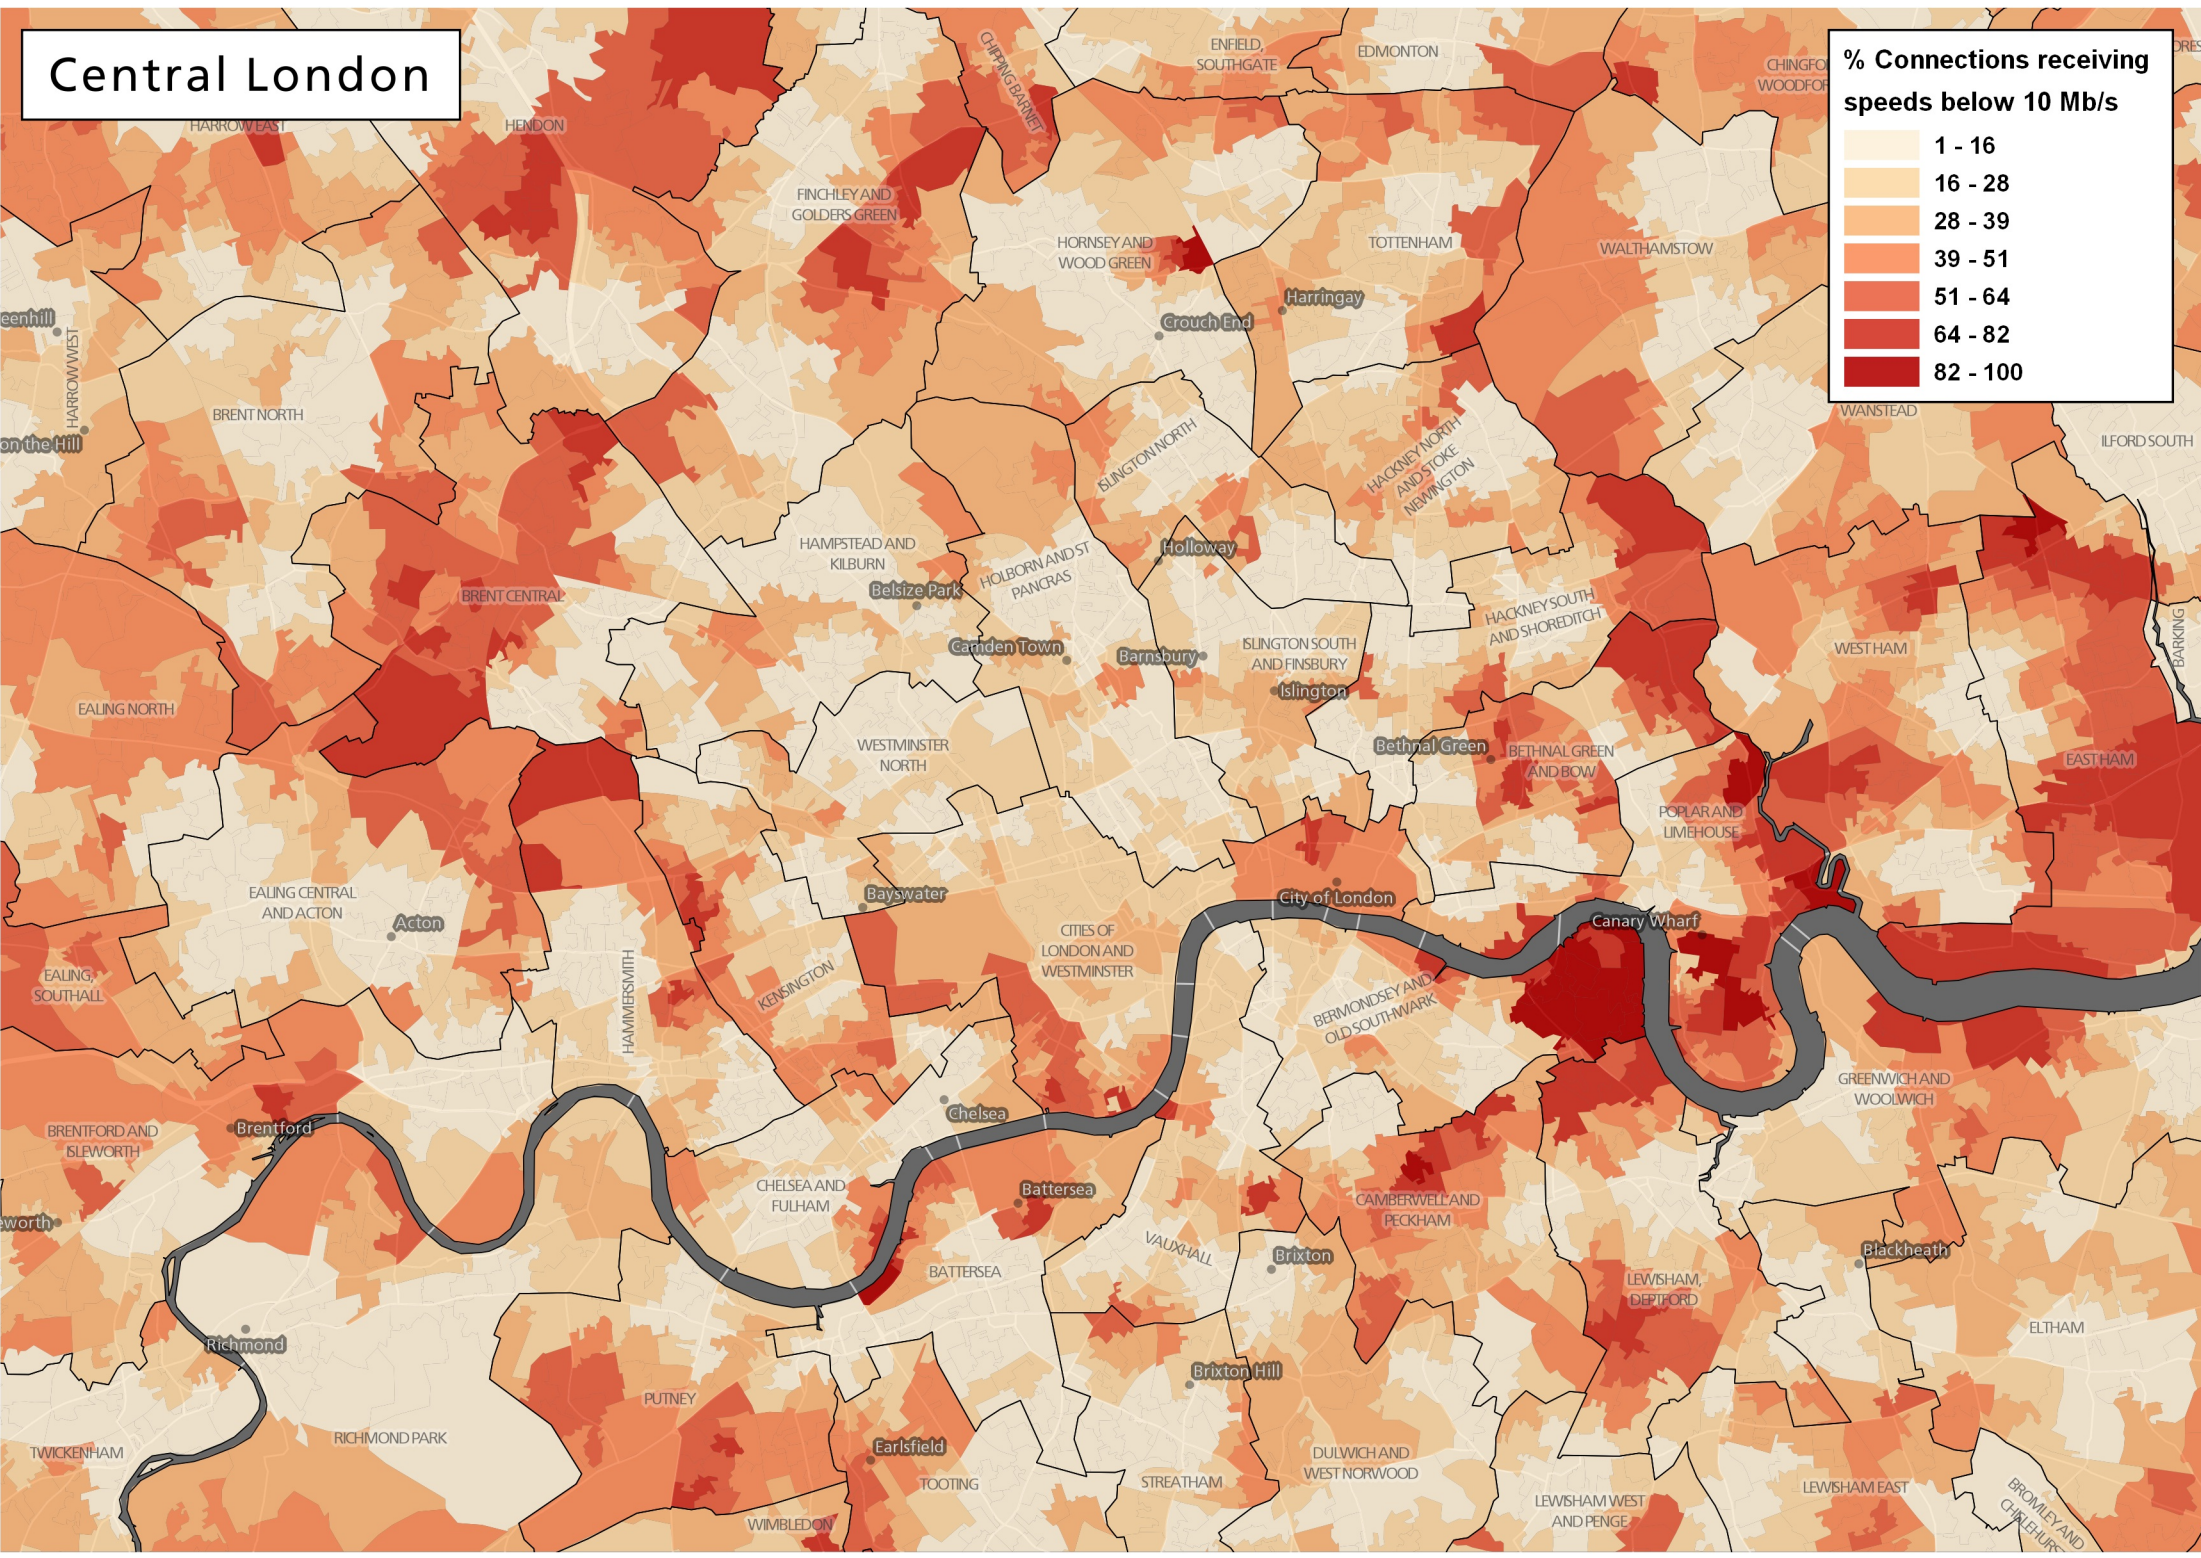

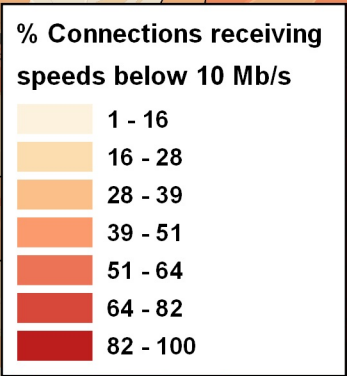

For broader maps of GB regions, see **Appendix 1**.

#### **Index**

Central London	2
Manchester	3
Birmingham area	4
Greater Glasgow	5
West Yorkshire urban area	6
Merseyside	7
Sheffield area	8
Tyne & Wear	9
Nottingham & Derby	10
Southampton & Portsmouth	11
Cardiff	12
Bristol	13
Edinburgh	14
Teesside	15
Aberdeen	16
