

London Councils analysis of Department for Education funding figures

Notes / sources

These figures have been calculated using the Department for Education figures.

Section [a] shows the impact of the final national funding formula compared to the 2016/17 baseline. This is calculated by aggregating school-level figures from DfE's illustrative allocation tables: <https://consult.education.gov.uk/funding-policy-unit/schools-national-funding-formula2/>

Section [b] shows the impact of the NFF in year one (2018/19), with transitional arrangements applied. Section [c] shows the number of schools set to gain or lose funding under the formula.

Section [d] combines the impact of the national funding formula with the wider cost pressures identified by the National Audit Office (NAO) in their 'Financial sustainability of schools' report: <https://www.nao.org.uk/report/financial-sustainability-in-schools/>

This NAO report said 'The Department estimates that mainstream schools will have to find savings of £3.0 billion (8.0%) by 2019-20'. The figures shown in section (d) are based on the savings in 2018/19 of 6.3% as identified by the NAO.

	National Funding Formula impact (as in DfE NFF consultation)						Total cost pressures	
	NFF: impact of final NFF (after transitional arrangements)		NFF: impact in year one (2018/19)		NFF: school-level gains and losses		Total savings required by 2018/19 (NFF + wider cost pressures)	
	[a]		[b]		[c]		[d]	
	£	%	£	%	No. of schools set to gain	No. of schools set to lose	£	%
