Wheelchairs

To ensure your safety, if you need to use a wheelchair when travelling in a licensed London taxi you must travel facing the rear of the taxi with your back to the partition and use the attachment belts provided. Many larger electric wheelchairs cannot be positioned and safely secured in this way, due to their size, and so are unsuitable for use when travelling on the Taxicard scheme.

Many mobility scooters cannot be safely secured or are too heavy to use the ramps in licensed London taxis and therefore cannot be used when travelling on the Taxicard scheme.

However, the customer can travel if the electric wheelchair can be safely secured and the scooter is not too heavy and the customer can transfer from it to the back seat of the taxi in order to travel.

If you use a wheelchair or scooter, we need some additional information from you so that we can establish the best way that we can provide the Taxicard service for you. Our ability to provide a suitable vehicle for you will be limited if you do not have access to a wheelchair of a type which can be safely secured in a London taxi and you are not able to transfer to a seat when travelling.

Please tick if any of the following apply to you

Manual wheelchair
Do you use a manual wheelchair: Yes <input type="checkbox"/> No <input type="checkbox"/>
If yes, can you transfer to a seat when travelling? Yes <input type="checkbox"/> No <input type="checkbox"/>
